

source/haruengine/Segment.h

```
graph TD; A[source/haruengine/Segment.h] --> B[memory]; A --> C[SDL2/SDL.h]
```

The diagram illustrates a header file dependency. A central box labeled 'source/haruengine/Segment.h' has two arrows pointing downwards to two separate boxes: 'memory' on the left and 'SDL2/SDL.h' on the right. This indicates that the Segment.h file includes or depends on both the memory module and the SDL2 library.
